3. RESERVE

The Board of Directors of your Company has not transferred any amount to reserves during the financial year ended 31st March, 2026. Accordingly, no reserve has been created or appropriated for the said financial year.

4. PRESENT STATUS OF THE UNIT

The Company was historically engaged in manufacturing cotton yarn, denim fabrics, shirtings, and garments. Following directions of the Hon'ble Gujarat High Court, later upheld by the Hon'ble Supreme Court of India, regarding closure of polluting industries in and around Ahmedabad, the Company discontinued its core manufacturing operations. To ensure business continuity and preserve shareholder value, it diversified into cotton trading from November 2022 and continued operations in the textile value chain. Accordingly, up to the quarter ended September 2025, "Textile" was identified as the primary reportable business segment.

Further, pursuant to the Share Purchase Agreement dated July 09, 2025, executed between the existing Promoters/Promoter Group and the Purchasers/Transferees, requests were received for transfer of 2,47,68,058 equity shares, representing 74.98% of the paid-up equity share capital of the Company. Consequent to the change in management and control, the Company restructured its business operations and, with effect from the quarter ended December 2025, commenced operations solely in the highway construction business. Accordingly, "Highway Construction" became its only reportable primary business segment thereafter.

5. EXPORT

The FOB value of the exports during the Year under review was Nil against zero export in the previous year due to the closure of the manufacturing operation as detailed in point No 4.

6. CHANGE IN NATURE OF BUSINESS

7. OPPORTUNITIES AND CHALLENGES

During the financial year 2025-26, the Company witnessed a significant transition in its business operations. Owing to the discontinuation/non-operation of textile manufacturing activities, the Company commenced infrastructure-related operations, primarily involving execution of road construction and allied projects received from the Holding Company.

The management believes that the infrastructure and road development sector in India offers substantial long-term opportunities driven by increased Government expenditure on roads, highways, urban infrastructure, connectivity and public development initiatives. The Company expects that its association with the Holding Company and group ecosystem will support gradual expansion of operational capabilities and project execution experience in the infrastructure segment.

The Company is focusing on developing technical expertise, strengthening project management capabilities, expanding vendor networks and ensuring efficient resource utilization for successful execution of road construction contracts. The diversification into infrastructure activities is expected to provide an alternative avenue for revenue generation and business growth over the medium to long term.

However, the infrastructure business is exposed to various challenges and risks, including fluctuations in raw material prices, labour availability, regulatory approvals, project execution delays, adverse weather conditions, high working capital requirements and competitive market conditions. Timely execution of projects and effective cost management remain critical for maintaining profitability in this sector.

Further, since the Company is in the initial phase of transitioning into infrastructure-related activities, operational stabilization and strengthening of execution capabilities may require time along with continued financial and managerial support.

The Board and management continuously monitor these opportunities and challenges and remain committed towards improving operational efficiency, maintaining quality standards and strengthening internal control systems to ensure sustainable growth in the Company's business operations.

MANAGEMENT DISCUSSION AND ANALYSIS

1. INDUSTRY STRUCTURE AND DEVELOPMENT:

The Company was historically engaged in the manufacturing of cotton yarn, denim fabrics, shirtings and garments. However, pursuant to the directions issued by the Hon'ble Gujarat High Court for closure of polluting industries in and around Ahmedabad, which were subsequently upheld by the Hon'ble Supreme Court of India, the Company discontinued its core manufacturing operations.

In order to sustain business continuity, preserve shareholder value and leverage its industry experience, the Company strategically diversified into the trading of cotton and cotton yarn with effect from November 2022. This transition reflected the Company's adaptive approach towards changing regulatory and business conditions while continuing its presence within the textile value chain. Accordingly, up to the quarter ended September 2025, the Company was primarily engaged in the trading of cotton and cotton yarn and identified "Textile" as its reportable primary business segment.

Further, pursuant to the Share Purchase Agreement ("SPA") dated July 09, 2025 executed amongst Shri Surendra Kumar Somany, Surendra Kumar Somany HUF, Shri Arvind Kumar Somany, Arvind Kumar Somany HUF, Shri Prasann Somany and Sarvopari Investments Private Limited (collectively referred to as the "Sellers/Promoters and members of the Promoter Group") and Roadway Solutions India Infra Limited, Shri Ameet Harjinder Gadhoke and Smt. Teja Ranade Gadhoke (collectively referred to as the "Purchasers/Transferees"), the Company received requests for transfer of 2,47,68,058 equity shares representing 74.98% of the paid-up equity share capital of the Company from the promoter shareholders and members of the Promoter Group for consideration and approval of the Board.

Consequent to the aforesaid change in management and control of the Company, the business operations were restructured. Accordingly, with effect from the quarter ended December 2025, the Company commenced operations in the infrastructure sector, primarily involving execution of highway and road construction projects, which became the sole reportable primary business segment of the Company.

The Indian infrastructure sector continues to remain one of the key focus areas for economic development. Increased Government emphasis on highways, roads, urban connectivity and public infrastructure development is expected to generate sustained opportunities for companies operating in this sector. Continued investments in transportation infrastructure, public-private partnership initiatives and budgetary allocations towards road development are expected to support long-term growth prospects.

The Company has commenced execution of road construction and allied projects received from its Holding Company/group entities. The management believes that diversification into infrastructure-related activities will provide opportunities for operational growth, business stability and long-term value creation.

2. OPPORTUNITIES AND THREATS

Opportunities

- Increased Government expenditure on roads, highways and infrastructure development projects.
- Growing demand for transportation, urban connectivity and public infrastructure.
- Opportunity to leverage business support and project pipeline from the Holding Company/group entities.
- Scope for gradual expansion into allied infrastructure and civil construction activities.
- Diversification of business operations and revenue streams.
- Development of operational capabilities and project execution expertise in the infrastructure sector.
- Long-term growth opportunities arising from continued investments in infrastructure development.

Threats

- Intense competition in the infrastructure and construction industry.
- Fluctuation in prices of key construction materials such as steel, cement, bitumen and fuel.
- Delays in regulatory approvals, project execution and realization of payments.
- High working capital requirements and cost overruns in infrastructure projects.
- Dependence on availability of skilled labour, subcontractors and supply chain resources.

- Exposure to adverse weather conditions and site execution risks.
- Operational and execution challenges associated with transition into a new line of business.
- Risks arising from economic slowdown, policy changes and regulatory developments affecting the infrastructure sector.

3. SEGMENT-WISE PERFORMANCE

During the financial year 2025-26, the Company did not undertake significant textile manufacturing activities. Up to the quarter ended September 2025, the Company was primarily engaged in trading of cotton and cotton yarn under the textile segment.

Consequent to the change in management and restructuring of business operations, the Company commenced infrastructure-related activities with effect from the quarter ended December 2025, primarily involving execution of road construction and allied projects. Accordingly, the infrastructure business became the sole reportable primary business segment of the Company.

As the Company is presently in the transition phase of business operations, the financial and operational performance during the year may not be directly comparable with previous years.

The management continues to evaluate opportunities for strengthening the Company's operational capabilities and expanding its presence in the infrastructure sector.

4. OUTLOOK

The management remains cautiously optimistic regarding the future prospects of the infrastructure business. Continued Government focus on development of roads, highways, urban connectivity and public infrastructure is expected to support growth opportunities in the sector over the medium and long term.

The Company intends to strengthen its project execution capabilities, improve operational efficiency and develop technical expertise in road construction and allied infrastructure activities. The support and business association with the Holding Company/group entities is expected to facilitate gradual expansion of operations and enhancement of operational capabilities.

The management believes that diversification into infrastructure-related activities may provide long-term business stability and alternative avenues for revenue generation and growth.

However, the infrastructure sector is capital intensive and exposed to various execution and operational risks, including fluctuations in raw material prices, delays in project execution and working capital constraints. Accordingly, the Company intends to continue adopting a prudent and disciplined approach towards project selection, cost management and financial planning.

5. RISKS AND CONCERNS

The Company is exposed to various risks associated with the infrastructure and construction sector, including:

- Delays in project execution and completion.
- Cost overruns and escalation in project costs.
- Volatility in prices of raw materials such as steel, cement, bitumen and fuel.
- High working capital requirements and liquidity management challenges.
- Contractual, legal and regulatory compliance risks.
- Dependence on availability of skilled labour, subcontractors and other resources.
- Operational disruptions arising from adverse weather conditions and site-related challenges.
- Competitive market conditions and pressure on margins.
- Risks associated with transition into a new line of business and operational stabilization.

The Company continuously reviews and strengthens its risk management framework and undertakes appropriate mitigation measures to minimise the impact of such risks on its operations and financial performance.

6. INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY

The Company has established adequate internal control systems commensurate with the size and nature of its operations. The internal control framework is designed to ensure safeguarding of assets, proper recording and reporting of transactions, reliability of financial reporting, operational efficiency and compliance with applicable laws and regulations.

The Company continuously reviews and strengthens its internal control systems to align with evolving business requirements and operational needs. The management periodically evaluates the effectiveness of such controls and undertakes necessary corrective and preventive measures wherever required.

7. HUMAN RESOURCES

The Company recognizes that its employees and workforce are important contributors to its growth and operational performance. During the transition into infrastructure-related activities, the Company has focused on developing appropriate technical and operational capabilities aligned with its new business operations.

During the year under review, the Company implemented a Voluntary Retirement Scheme (VRS) and successfully reached compensation settlements with the majority of its permanent employees. The Company places on record its sincere appreciation for the valuable contribution, dedication and support extended by its workforce over the years.

Industrial relations during the year remained cordial. The Company remains committed to maintaining a positive, transparent and respectful work environment.

8. FINANCIAL PERFORMANCE WITH RESPECT TO OPERATIONAL PERFORMANCE

The financial performance of the Company during the year reflects the transition in its business operations from textile manufacturing/trading activities to infrastructure-related operations, primarily involving execution of road construction projects.

Since the Company is in the initial stage of establishing and stabilizing its presence in the infrastructure segment, the operational and financial results during the year may not be directly comparable with previous periods and may undergo fluctuations during the stabilization phase.

The management remains focused on efficient resource utilization, effective cost management, strengthening operational capabilities and gradual improvement in overall operational performance.

9. CAUTIONARY STATEMENT

Statements in this “Management Discussion and Analysis” describing the Company’s objectives, projections, estimates, expectations or predictions may constitute “forward-looking statements” within the meaning of applicable laws and regulations. Actual results may differ materially from those expressed or implied due to various factors including, but not limited to, economic conditions, Government policies, regulatory developments, market demand, price fluctuations, competitive conditions and other incidental factors and risks beyond the control of the Company.

If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Standalone Ind AS Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

Materiality is the magnitude of misstatements in the Standalone Ind AS Financial Statements that, individually or in the aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the Standalone Ind AS Financial Statements may be influenced. ANNUAL REPORT 2025-26

Notes to the Standalone financial statements for the year ended 31st March, 2026

1 GENERAL INFORMATION

The company was originally established R.B. Rodda & Co. Ltd. in the year 1940 under the Indian Companies Act, VII of 1913 and the name of the company was changed to Soma Textiles & Industries Ltd. on 21st January, 1992. The Company is currently engaged in Highway Construction. The address of its registered office is 2, Red Cross Place, Kolkata, West Bengal - 700001.

2 MATERIAL ACCOUNTING POLICIES

2.01 Statement of Compliance:

These financial statements of the Company comprising of Balance Sheet, Statement of Profit and Loss, Statement of changes in Equity and Cash Flow Statement together with the notes have been prepared in accordance with Indian Accounting Standards notified under the Companies (Indian Accounting Standards) Rules, 2015 ("Ind AS") as amended by the Companies (Indian Accounting Standards) Rules, 2016, the Companies (Indian Accounting Standards) Rules, 2017 and other relevant provisions of the Companies Act, 2013.

2.02 Basis of Preparation and Presentation:

The Financial Statements have been prepared on the historical cost basis except for certain financial instruments measured at fair value at the end of each reporting period, as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis, except for leasing transactions that are within the scope of Ind AS 17, and measurements that have some similarities to fair value but are not fair value, such as net realizable value in Ind AS 2 or value in use in Ind AS 36.

In addition, for financial reporting purposes, fair value measurements are categorized into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurements in its entirety, which are described as follows:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

Level 2 inputs are inputs, other than quoted prices included within level 1, that are observable for the asset or liability, either directly or indirectly; and

Level 3 inputs are unobservable inputs for the asset or liability.

The financial statements are presented in Indian Rupees (₹) which is the Company's functional and presentation currency. All amounts disclosed in the financial statements and notes have been rounded off to the nearest Rupees in lakhs (upto two decimals), except share data and as otherwise stated as per the requirement of Schedule III of the Companies Act, 2013. The financial statements were approved by the Board of Directors on 30th May, 2026."

All assets and liabilities have been classified as current or non-current as per the Company's operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013 and Ind AS 1 "Presentation of financial statements". Based on the nature of products and the time between the acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle as twelve months for the purpose of current-non current classification of assets and liabilities.

2.03 Revenue Recognition:

Revenue from highway construction work contracts is recognised in accordance with Ind AS 115 – Revenue from Contracts with Customers when control of promised goods or services is transferred to the customer in an amount that reflects the consideration to which the Company expects to be entitled. The Company assesses each contract to identify distinct performance obligations and determines whether such

obligations are satisfied over time or at a point in time. In case of highway construction contracts, performance obligations are generally satisfied over time since the asset constructed is controlled by the customer as the work progresses and the Company has an enforceable right to payment for performance completed to date, where applicable. Accordingly, revenue from construction contracts is recognised over time using the input method, based on proportion of contract costs incurred to date relative to estimated total contract costs (cost-to-cost method), as this method faithfully depicts transfer of control and progress towards complete satisfaction of the performance obligation. Revenue recognised includes contract consideration, approved variations, escalation claims, incentives and bonuses to the extent it is highly probable that a significant reversal of cumulative revenue recognised will not occur when the uncertainty associated with such consideration is subsequently resolved. Claims and variation orders are recognised only when recovery is considered probable and approval by the customer is reasonably certain. Where the outcome of a contract cannot be measured reliably, revenue is recognised only to the extent of contract costs incurred that are expected to be recoverable.

Contract Costs:

Costs incurred in relation to highway construction contracts, including materials, labour, subcontracting charges, site overheads, equipment usage, borrowing costs directly attributable (where qualifying asset criteria are met), project mobilisation expenses and other directly attributable expenditures, are recognised in the statement of profit and loss based on stage of completion.

Mobilisation advances, security deposits and retention money are accounted for in accordance with the underlying contractual arrangements. Retention receivables are recognised when the Company has an unconditional right to consideration, subject to contractual terms."

Contract Assets and Contract Liabilities:

A contract asset is recognised when the Company has transferred goods or services to the customer before the customer pays consideration or before payment becomes due and the right to consideration is conditional on factors other than passage of time. Contract assets primarily represent unbilled revenue in respect of work completed. Trade receivables are recognised when the Company has an unconditional right to consideration. Contract liabilities primarily represent mobilisation advances, advances from customers and billing in excess of revenue recognised and are recognised when consideration is received or due before related performance obligations are satisfied.

Expected Losses / Onerous Contracts:

Provision for expected losses on incomplete contracts is recognised in full in the period in which such losses become probable and can be reliably estimated, considering total estimated contract revenue and costs, in accordance with applicable accounting standards."

Estimation Uncertainty:

The recognition of revenue from construction contracts requires significant judgments and estimates, including determination of transaction price, identification of performance obligations, estimation of total contract costs, stage of completion, recoverability of claims and variation orders, assessment of liquidated damages, and evaluation of probable economic benefits.

2.04 Goods and Service Tax:

All items in the financial statements are presented exclusive of Goods and Services Tax (GST) except for receivables and payables, which are presented on a GST-inclusive basis. Where GST is not recoverable as input tax, it is recognized as part of the related asset or expense. The net amount of GST recoverable from the Department is included as part of receivables in the Financial Statement.

2.05 Other Income:

- a) Interest income is recognised on the time proportion basis, by reference to the principal outstanding and the effective interest rate applicable.
- b) Insurance and other claims are accounted as and when unconditionally admitted by the appropriate authorities.
- c) Gains or Losses arising on retirement or disposal of property, plant and equipment are recognised in the Statement of Profit and Loss in the year of such retirement or disposal.

2.06 Property, Plant and Equipment:

Property, plant and equipment is stated at acquisition cost net of accumulated depreciation and accumulated impairment losses, if any. Subsequent costs are included in the asset's carrying amount or recognised as asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the Statement of Profit and Loss during the period in which they are incurred.

Gains or Losses arising on retirement or disposal of property, plant and equipment are recognised in the Statement of Profit and Loss.

Capital work-in-progress / intangible assets under development are carried at cost, comprising direct cost, related incidental expenses and attributable borrowing cost.

The management's estimate of useful lives are in accordance with Schedule II to the Companies Act, 2013. Depreciation is provided on pro-rata basis on the straight line method over the useful life of assets. The useful life, residual value and the depreciation method are reviewed atleast at each financial year end and adjusted prospectively.

Spares in the nature of capital spares/ insurance spares are added to the cost of the assets. The total cost of such spares is depreciated over a period not exceeding the useful life of the asset to which they relate.

Capital Subsidy under TUFS from Ministry of Textiles on specified processing machinery has been deducted from the respective Fixed Assets and is represented at their Net off values.

2.07 Intangible Assets:

Intangible assets are stated at acquisition cost, net of accumulated amortisation and accumulated impairment losses, if any. Intangible assets are amortised on a straight line basis over their estimated useful lives. The amortisation period and amortisation method are reviewed at least at each financial year end. If the expected useful life of the asset is significantly different from previous estimates, the amortisation period is changed accordingly.

2.08 Impairment of assets:

Property, plant and equipment and intangible assets with finite life are evaluated for recoverability whenever there is any indication that their carrying amounts may not be recoverable. If any such indication exists, the recoverable amount (i.e. higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the cash generating unit (CGU) to which the asset belongs.

If the recoverable amount of an asset (or CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or CGU) is reduced to its recoverable amount. An impairment loss is recognised in the Statement of Profit and Loss.

When an impairment loss subsequently reverses, the carrying amount of the asset or a cash-generating unit is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) earlier.

2.09 Investments :

Investments are classified as Long Term Investments and Current Investments. Long term investments are stated at Cost. Provision is made for diminution in the value of Long term Investments to recognise a decline, if any other than temporary in nature.

2.10 Financial instruments:

1. Initial recognition and measurement

Financial assets and/or financial liabilities are recognised when the Company becomes party to a contract embodying the related financial instruments. All financial assets, financial liabilities are initially measured at fair value. Transaction costs that are attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from as the case may be, the fair value of such assets or liabilities, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

2. Financial assets:

Classification and subsequent measurement of financial assets:

a) Classification of financial assets:

- (i) The Company classifies its financial assets in the following measurement categories:
 - those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
 - those measured at amortised cost.
- (ii) The classification is done depending upon the Company's business model for managing the financial assets and the contractual terms of the cash flows. "

b) Subsequent Measurement

(i) Equity instruments:

The Company subsequently measures all equity investments at fair value. There are two measurement categories into which the Company classifies its equity instruments:

Investments in equity instruments at FVTPL:

Investments in equity instruments are classified as at FVTPL, unless the Company irrevocably elects on initial recognition to present subsequent changes in fair value in other comprehensive income for equity instruments which are not held for trading.

Investments in equity instruments at FVTOCI:

On initial recognition, the Company can make an irrevocable election (on an instrument-by-instrument basis) to present the subsequent changes in fair value in other comprehensive income. This election is not permitted if the equity investment is held for trading. These elected investments are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the reserve for 'equity instruments through other comprehensive income'. The cumulative gain or loss is not reclassified to Statement of Profit and Loss on disposal of the investments.

c) Impairment of financial assets:

The Company applies the expected credit loss model for recognising impairment loss on financial assets measured at amortised cost, lease receivables, trade receivables, other contractual rights to receive cash or other financial asset. For trade receivables, the Company measures the loss allowance at an amount equal to lifetime expected credit losses. Further, for the purpose of measuring lifetime expected credit loss allowance for trade receivables, the Company has used a practical expedient as permitted under Ind AS 109. This expected credit loss allowance is computed based on a provision matrix which takes into account historical credit loss experience and adjusted for forward-looking information.

d) Derecognition of financial assets: Derecognition of financial assets:

A financial asset is primarily derecognised when:

1. the right to receive cash flows from the asset has expired, or
2. the Company has transferred its rights to receive cash flows from the asset; and
 - (a) the Company has transferred substantially all the risks and rewards of the asset, or
 - (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset."

On derecognition of a financial asset in its entirety (other than investments in equity instruments at FVOCI), the differences between the carrying amounts measured at the date of derecognition and the consideration received is recognised in the Statement of Profit and Loss.

3. Financial liabilities and equity instruments

Classification as debt or equity

Financial liabilities and equity instruments issued by the Company are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument. "

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities. Equity instruments are recorded at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instrument is recognised and deducted directly in equity. No gain or loss is recognised in the Statement of Profit and Loss on the purchase, sale, issue or cancellation of the Company's own equity instruments."

Financial Liabilities

Classification and subsequent measurement

The Company's financial liabilities include trade and other payables, loans and borrowings and derivative financial instruments. Subsequent measurement of financial liabilities depends on their classification as fair value through Profit and loss or at amortized cost. All changes in fair value of financial liabilities classified as FVTPL are recognized in the Statement of Profit and Loss. Amortised cost category is applicable to loans and borrowings, trade and other payables. After initial recognition the financial liabilities are measured at amortised cost using the Effective Interest Rate method."

Derecognition

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. Gains and losses are recognized in profit and loss when the liabilities are derecognized."

Offsetting of financial instruments

Financial assets and financial liabilities are offset and presented on net basis in the Balance Sheet when there is a currently enforceable legal right to offset the recognised amounts and there is an intention either to settle on a net basis or to realise the assets and settle the liabilities simultaneously.

Derivative financial instruments

Derivatives are initially recognised at fair value at the date the derivative contracts are entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognised in the Statement of profit and Loss immediately.

2.11 Inventories:

Inventories are stated at the lower of cost and net realisable value.

Cost of inventories comprise all costs of purchase (net of input credits), costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale."

Cost of raw materials and components, packing materials, stores, spare parts other than specific spares for machinery and finished goods are determined on the basis of 'First-in-First-out' (FIFO) or 'Weighted Average Cost', as applicable.

Cost of Materials in transit are determined at cost-to-date.

2.12 Foreign currencies:

Items included in the financial statements of the Company are recorded using the currency of the primary economic environment (INR) in which the Company operates (the 'functional currency')

Foreign currency transactions are translated into the functional currency using exchange rates at the date of the transaction. Foreign exchange gains and losses from settlement of these transactions, and from translation of monetary assets and liabilities at the reporting date exchange rates are recognised in the Statement of Profit and Loss.

2.13 Employee Benefits:

Retirement benefit costs and termination benefits:

Defined Contribution Plans

Payment to defined contribution retirement benefit plans are recognised as an expense when employees have rendered service entitling them to the contributions.

Contributions to Provident and Family Pension Fund and Superannuation scheme, which are defined contribution plans, are made as required by the statute and expensed in the Statement of profit and loss.

Defined Benefit Plans

For defined benefit retirement benefit plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Remeasurement comprising actuarial gains and losses and the effect of the changes to the return of plan assets (excluding net interest), is reflected immediately in the balance sheet with a charge or credit recognised in other comprehensive income in the period in which they occur. Remeasurement recognised in the other comprehensive income is reflected immediately in retained earnings and is not reclassified to Statement of Profit and Loss. Past service cost is recognised in Statement of Profit and Loss in the period of a plan amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the defined benefit liability or asset. Defined benefit costs are categorised as follows:

- service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);
- net interest expense or income; and
- remeasurement

The Company presents the first two components of defined benefit costs in the Statement of Profit and Loss in the line item "Employee benefits expense". Curtailment gains and losses are accounted for as past service cost.

Short-term and other long-term employee benefits:

Short term employee benefits are recognized as an expense at undiscounted amount in the Statement of Profit and Loss of the year in which the related service is rendered.

2.14 Borrowing Costs:

- (a) Borrowing costs that are attributable to the acquisition, construction, or production of a qualifying asset are capitalised as a part of the cost of such asset till such time the asset is ready for its intended use or sale. A qualifying asset is an asset that necessarily requires a substantial period of time (generally over twelve months) to get ready for its intended use or sale.
- (b) All other borrowing costs are recognised as expense in the period in which they are incurred.

2.15 Taxation:

Tax expense comprises current and deferred tax. Current tax is measured at the amount estimated/calculated to be paid to the tax authorities in accordance with the Income-tax Act, 1961. Deferred tax reflects the tax effect of the timing differences between accounting income and taxable income originating and reversing during the year. Deferred tax is measured based on the tax rate and tax laws enacted or substantially enacted at the balance sheet date. Deferred tax assets are recognised only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised.

2.16 Provisions, Contingent Liabilities and Contingent Assets:

Provisions : Provisions are recognised when there is a present legal or constructive obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are measured using the cash flows estimated to settle the present obligation at the Balance sheet date.

Contingent Liabilities : Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

Contingent Assets : Contingent assets are disclosed, where an inflow of economic benefits is probable.

ANNUAL REPORT 2025-26

2.17 Cash and cash equivalents:

Cash and Cash equivalents include cash, cheques on hand, cash at bank and short term deposits with banks having original maturity of three months or less, which are subject to insignificant risk of changes in value.

2.18 Non-current Assets held for sale:

The Company classifies non-current assets as held for sale if their carrying amounts will be recovered principally through a sale rather than through continuing use of the assets and actions required to complete such sale indicate that it is unlikely that significant changes to the plan to sell will be made or that the decision to sell will be withdrawn. Also, such assets are classified as held for sale only if the management expects to complete the sale within one year from the date of classification.

Non-current assets classified as held for sale are measured at their carrying amount as current market valuation is not available. Property, plant and equipment and intangible assets once classified as held for sale are not depreciated or amortised.

2.19 Statement of Cash Flows:

Cash flows are reported using the indirect method whereby profit / (loss) is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

2.20 Earnings per Share:

Basic earnings per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.

2.21 Critical accounting judgements and key sources of estimation uncertainty:

The preparation of financial statements in conformity with Ind AS requires that the management of the Company makes judgments, estimates and assumptions that affect the reported amounts of income and expenses of the period, the reported balances of assets and liabilities and the disclosures relating to contingent liabilities as of the date of the financial statements. The judgments, estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to significant accounting estimates include useful lives and impairment of property, plant and equipment, allowance for doubtful debts/advances, deferred tax assets, future obligations in respect of retirement benefit plans, expected cost of completion of contracts, allowances for inventories, etc. Difference, if any, between the actual results and estimates is recognised in the period in which the results are known.

(i) Useful lives and Impairment of property, plant and equipment

The Company reviews the useful life of property, plant and equipment at the end of each reporting period. This re-assessment may result in change in depreciation expense in future periods.

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Company makes an estimate of the asset's recoverable amount. An asset's recoverable amount is the higher of its fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets and the asset's value in use cannot be estimated to be close to its fair value. In such cases the asset is tested for impairment as part of the cash-generating unit to which it belongs. When the carrying amount of an asset or cash-generating unit exceeds its recoverable amount, the asset or cash-generating unit is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Impairment losses relating to continuing operations are recognised in those expense categories consistent with the function of the impaired asset.

(ii) Allowance for doubtful debts/advances

When determining the lifetime expected credit losses for trade receivables, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and credit assessment and including forward-looking information."

(iii) Deferred tax assets

Significant management judgment is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits. The amount of total deferred tax assets could change if estimates of projected future taxable income or if tax regulations undergo a change. "

(iv) Employee Benefit Obligations

Employee benefit obligations are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, employee benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

(vi) Allowance for Inventories

An inventory provision is recognised for cases where the realisable value is estimated to be lower than the inventory carrying value. The inventory provision is estimated taking into account various factors, including prevailing sales prices of inventory item and losses associated with obsolete / non-moving inventory items."

2.22 Recent Accounting Developments:

Classification of Liabilities as Current or Non-current and Non-current Liabilities with Covenants - Amendments to Ind AS 1- This amendment also includes specific provisions that will take effect for reporting periods beginning on or after 1st April, 2026, as outlined below. Under the existing Ind AS 1, where there is a breach of a material provision of a long-term loan arrangement on or before the end of the reporting period with the effect that the liability becomes payable on demand on the reporting date, the entity does not classify the liability as current, if the lender agreed, after the reporting period and before the approval of the financial statements for issue, not to demand payment as a consequence of the breach. However, the amended requirements stipulate that entities will no longer be permitted to consider lender waivers that are granted after the reporting date but before the financial statements are approved for the purpose of classification of loans. This amendment is required to be applied retrospectively in accordance with Ind AS 8. The Company does not expect this amendment to have an impact on its operations or financial statements."

31 Employee benefit plans

1) Defined contribution plans :

The Company participates in defined contribution plans on behalf of relevant personnel. Any expense recognised in relation to these schemes represents the value of contributions payable during the period by the Company at rates specified by the rules of those plans. The only amounts included in the balance sheet are those relating to the prior months contributions that were not due to be paid until after the end of the reporting period.

The defined contribution plans are as below:

a) Provident fund

In accordance with the Employee's Provident Fund and Miscellaneous Provisions Act, 1952 eligible employees of the Company are entitled to receive benefits in respect of provident fund, a defined contribution plan, in which both employees and the Company make monthly contributions at a specified percentage of the covered employees' salary. The contributions, as specified under the law, are made to the provident fund administered and managed by Government of India (GOI). The Company has no further obligations under the fund managed by the GOI beyond its monthly contributions which are charged to the Statement of Profit and Loss in the period they are incurred. The benefits are paid to employees on their retirement or resignation from the Company.

Contribution to Defined Contribution Plans, recognised in the Statement of Profit and Loss for the year under employee benefits expense, are as under :

(2) Defined Benefit Plans:

The Defined Benefit Plan is as below:

Gratuity (unfunded)

The present value of obligation is determined based on actuarial valuation using the Projected Unit Credit Method, which recognises each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation. The obligation for compensated absences is recognised in the same manner as gratuity.

The plan typically exposes the Company to actuarial risks such as: investment risk, interest rate risk, longevity risk and salary risk.

Investment risk

The Probability or likelihood of occurrence of losses relative to the expected return on any particular investment.

Interest risk

If the Discount Rate i.e the yield on the Government Bonds decrease in future, the Actuarial Liability will increase and vice versa.

The quantum of increase in valuation liability corresponding to specific decrease in the Discount Rate and vice versa, has been shown in the annexure containing the sensitivity Analysis of Key Actuarial Assumption.

Longevity risk

If the Mortality rate experienced by the staff of a particular company is higher than what is assumed in mortality Table used in the valuation, the valuation liability will increase.

However, it will be very cumbersome to measure the quantum of increase for assumed reduction of Mortality rates as can be done in case of changes in salary Growth Rate and Interest Rate.

Salary risk

If the salary Growth Rate over the future years of services is increased, the Actuarial Liability will increase and vice versa.

The quantum of increase in the valuation liability corresponding to specific increase in the salary growth rate and vice versa has been shown in the annexure containing Sensitivity Analysis of key Actuarial Assumption.

The most recent actuarial valuation of the present value of the defined benefit obligation was carried out at 31st March, 2026 by an independent actuary. The present value of the defined benefit obligation, the related current service cost and past service cost were measured using the projected unit credit method.

H. Sensitivity Analysis

The Sensitivity Analysis below has been determined based on reasonably possible change of the respective assumptions occurring at the end of the reporting period, while holding all other assumptions constant. These sensitivities show the hypothetical impact of a change in each of the listed assumptions in isolation. While each of these sensitivities holds all other assumptions constant, in practice such assumptions rarely change in isolation and the asset value changes may offset the impact to some extent. For presenting the sensitivities, the present value of the Defined Benefit Obligation has been calculated using the projected unit credit method at the end of the reporting period, which is the same as that applied in calculating the Defined Benefit Obligation presented above. There was no change in the methods and assumptions used in the preparation of the Sensitivity Analysis from previous year.

Auditor's Responsibilities for the Audit of the Consolidated Ind AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the Consolidated Ind AS Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Consolidated Ind AS Financial Statements.

As part of an audit in accordance with Standards on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Consolidated Ind AS Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3)(i) of the Act, we are also responsible for explaining our opinion on whether the Holding Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's (including its associate) ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Consolidated Ind AS Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company (including its associate) to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Consolidated Ind AS Financial Statements, including the disclosures, and whether the Consolidated Ind AS Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities within the Group to express an opinion on the Consolidated Ind AS Financial Statements. We are responsible for the direction, supervision and performance of the audit of the financial statements of such entities or business activities included in the consolidated financial statements of which we are the independent auditors. For the other entities or business activities included in the consolidated financial statements, which have been audited by the other auditors, such other auditors remain responsible for the direction, supervision and performance of the audits carried out by them. For the other entities included in the consolidated financial statements, which have been certified by the management and approved by the board of directors of the Holding company, holding company's management is responsible for such financial statements. We remain solely responsible for our audit opinion.

Materiality is the magnitude of misstatements in the Consolidated Ind AS Financial Statements that, individually or in the aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the Consolidated Ind AS Financial Statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work, and (ii) evaluating the effect of any identified misstatements in the Consolidated Ind AS Financial Statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Consolidated Ind AS Financial Statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Notes to the consolidated financial statements for the year ended 31st March, 2026**2. MATERIAL ACCOUNTING POLICIES**

The consolidated financial statements includes results of the associates of Soma Textile & Industries Limited, consolidated in accordance with Indian Accounting Standards 28 'Investment in Associates and Joint Ventures.

Name of the company	Country of Incorporation	% shareholding of Soma Textile & Industries Limited	Consolidated as
Soma Textile FZC	Outside India	40%	Associate

An associate is an entity over which the Group is in a position to exercise significant influence over operating and financial policies. The considerations made in determining whether significant influence is being exercised are similar to those necessary to determine control over the subsidiaries.

The Group's investments in its associate are accounted for using the equity method. Under the equity method, the investment in an associate is initially recognised at cost. The carrying amount of the investment is adjusted to recognise changes in the Group's share of net assets of the associate since the acquisition date. Goodwill relating to the associate is included in the carrying amount of the investment and is not tested for impairment individually.

The Statement of Profit and Loss reflects the Group's share of the results of operations of the associate. Any change in OCI of those investees is presented as part of the Group's OCI. In addition, when there has been a change recognised directly in the equity of the associate, the Group recognises its share of any changes, when applicable, in the Statement of Changes in Equity.

Unrealised gains and losses resulting from transactions between the Group and the associate are eliminated to the extent of the interest in the associate.

If an entity's share of losses of an associate equals or exceeds its interest in the associate (which includes any long-term interest that, in substance, form part of the Group's net investment in the associate), the entity discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate. If the associate subsequently reports profits, the entity resumes recognising its share of those profits only after its share of the profits equals the share of losses not recognised.

The aggregate of the Group's share of profit or loss of an associate is shown on the face of the Statement of Profit and Loss.

For the purpose of Section 2(6) of the Companies Act, 2013, "associate company", in relation to another company, means a company in which that the other company has a significant influence, but which is not a subsidiary company of the company having such influence and includes a joint venture company. Explanation- For the purpose of this clause, "significant influence" means control of at least twenty per cent of total share capital and/or the ability to significantly influence the operational and financial policies of the company but not control them. The holding of Soma Textiles & Industries Limited in Soma Textile FZC is 40%. The Soma Textile FZC is consolidated as an associates by virtue of formers ability to influence the operational and financial policies whereby the share of the parent in the associate's net worth and profit has been picked up and accounted for under an independent line item in the "General Reserve", "investment" and "Statement of profit and loss". The excess of cost of investment in the associate and the share of net worth of the associate on the day of investing is reflected as "Goodwill"

These financial statements of the Company have been prepared in accordance with Indian Accounting Standards notified under the Companies (Indian Accounting Standards) Rules, 2015 ("Ind AS") as amended by the Companies (Indian Accounting Standards) Rules, 2016, the Companies (Indian Accounting Standards) Rules, 2017 and other relevant provisions of the Companies Act, 2013. The Financial Statements have been prepared on the historical cost basis.
